

## Two cylinder glue applicator **DKDA - 30**

v1

2013/01/23

The applicator is designed for the one or two sided application of glue on wooden strips in the process of door plywood production. The machine is especially useful when making thick door plywood 50 - 220 mm thick, ensuring the even spreading of glue on the entire width of the strip. Setting the thickness of coated elements and the amount of glue spread is quick and easy, using handwheels. The special version of the DKDA - 30 machine is equipped with a roller supply conveyor and a receiving conveyor.

### TECHNICAL AND OPERATIONAL DATA:

Working width	mm	<b>300</b>
Element thickness	mm	<b>1 - 100</b>
Working level	mm	<b>650 - 850</b>
Spreading cylinder diameter	mm	<b>150</b>
Minimal amount of spread glue	g/m <sup>2</sup>	<b>110</b>
Installed power	kW	<b>0,37</b>
Supply voltage	V AC	<b>3/N/PE, 400V 50Hz</b>
Appliance mass	kg	<b>150</b>
