

## ANKP AUTOMATIC MACHINE APPLYING POLYURETHANE ADHESIVE

v1

2016/09/07

ANKP automatic machine applying polyurethane adhesive is a device for band-shaped applying the polyurethane adhesive on the board in the process of stacking stack for adhesive bonding.

The boards are laid by the operator in the magazine from where spreader gets items automatically and transports in the direction of the head, which applies adhesive, next board with the adhesive is stacked. The stack is fed on a roller conveyor. Application of high-performance system of applying polyurethane adhesive ensures trouble-free operation.

### TECHNICAL-OPERATIONAL DATA:

Number of heads	pcs	<b>14</b>
Working width	mm	<b>5-150</b>
Length min/max	mm	<b>1500-2500</b>
Stack height	mm	<b>200</b>
Working speed of the head	m/min	<b>40-120</b>
Installed power	KW	<b>3</b>
Operating voltage	V AC	<b>3x400/50Hz</b>
Control voltage	V DC	<b>24</b>
The air pressure in the installation/system	MPa	<b>0.6</b>
